**ONE OF THE BEST BATTLE-TESTED PROGRAMS TO KEEP ENTREPRENEURS
FROM GOING UNDER IN THE FIRST FIVE YEARS, IS GOING NATIONWIDE**

**---how the secret of having your “own” board of directors to strategically advise you
can multiply your chances of success, and equip you to compete more effectively,
even if you are only a “company” of one.**

DENVER, Colo.— Make-it-Fly® LLC's Advisory Board 101 program has proven so successful in the Denver area that Make-it-Fly® owners Dave Block and Victoria Munro have decided to train others to take it to cities across America. The Program has made its reputation by helping create community in the real world through its unique Advisory Board concept which consists of 12 non-competing business owners who follow a curriculum and participate in practical exercises, brainstorming, discussion and strategic goal setting, while exercising personal accountability.

At the in-depth four-day Make-it-Fly® Flight Instructor Training course, Dave Block and Victoria Munro not only share their own secrets to growing and maintaining a business and building a community of loyal raving fans, but they bring in skilled experts—leaders in their fields—who have successful track records to share their know-how with participants.

“Over the past four years, we have road tested this system,” says Victoria Munro, who has successfully started and run nine businesses. “More than 650 members have participated in Make-it-Fly® Advisory Boards and Make-it-Fly® Alumni Boards. We’ve grown Make-it-Fly® into a vital, caring community committed to one another’s success. Now, we’re ready to show others how you can do the same.”

Co-founder Dave Block says that Make-it-Fly® communities are more than mastermind groups. “Make-it-Fly® Advisory Boards become a community of business owners committed to each other’s success,” he says. “They provide the encouragement, support, resources and powerful tools needed to grow a profitable business.”

The next four-day Make-it-Fly® Flight Instructor Training course will be held in Denver, Colorado, in March 2008. To enable maximum interaction and one-on-one opportunities, the number of Flight Instructors is limited.
